

Precertification Program

HMAA requires precertification of hospital admissions and certain inpatient/outpatient services. Precertification requests are approved for medical necessity only. Approval is not a guarantee of benefits or payment and is contingent on standard eligibility verification. **Failure to obtain precertification may result in a reduction of benefits or payment.**

To obtain precertification: Mail or fax a completed **Precertification Request Form** as described below along with supporting clinical documentation at least two (2) business days **prior** to the planned service, surgery and/or admission; or within forty-eight (48) hours of an emergent admission. Forms are available on our website at hmaa.com.

Hospitals: Fax the admission face sheet within the time frames stated above.

Service Type	Mailing Address	Phone Number	Fax Number
